

## Connex Post & Beam

Connex Post & Beam is pleased to announce a new tool — the “Beam Boss” slotter. Creating accurate slots is key to using the Connex system. The new slotter has been in development for the last 18 months and is designed to provide a high quality tool for cutting slots faster and easier.

The Beam Boss slotter has the following advantages over the current EZ slotter:

- There is no requirement to secure (screw) the slotter to the beam
- The tool does not need a hole drilled in the chain saw bar
- The Beam Boss slotter comes with simple to use spacers that allow it to easily work with any size beam. Simple adjustments can be made with additional washers
- The slotter self centers with the spacers for beam sizes of 3.5 inches to 8 inches
- Will cut square or diagonal slots
- Full tool quality
- Fast and easy to use

	<b>EZ Slotter</b>	<b>The Beam Boss</b>	<b>Pro Slotter</b>
<b>Targeted Users</b>	Low cost/DIY jobs	Jobs with large number of slots	Multiple Jobs and large beam cutting
<b>Beam size</b>	3.5 to 8	3.5 to 8	All sizes
